Skills And Expertise

- MERN Stack (MongoDB, Express.js, React.js, Node.js):** Proven expertise in building full-stack applications with the MERN stack, delivering high-performance, scalable solutions. **HTML5, CSS3, JavaScript:** Advanced proficiency in core web technologies, ensuring the creation of responsive and interactive user interfaces.
- Tailwind CSS and Next.js:** Experienced in leveraging Tailwind CSS for modern, utility-first styling and Next.js for server-side rendering and static site generation.
- Real-Time Communication:** Developed real-time chat functionality in TinyTalk using Socket.IO for seamless, instant communication.
- Desktop Application Development:** Experienced in converting web applications to desktop apps using Electron.js and Tauri, exemplified by the Hospital Hub project.
- Adobe Illustrator:** Skilled in graphic design with Adobe Illustrator, capable of creating visually appealing and user-centric designs.
- Project Management:** Strong project management abilities, with a track record of leading and delivering projects like TinyTalk and Hospital Hub on time and to high standards.

Projects

Authentication Service

A standalone MERN-based authentication service implementing JSON Web Tokens (JWT) for secure user authentication and role-based access control for managing user permissions. This project demonstrates proficiency in backend security and user authentication, ensuring robust, scalable, and secure access management.

Web Developer's Portfolio:

A dynamic and interactive personal portfolio for a Web Developer designed to showcase professional work, skills, and projects. Built with modern web technologies like HTML, CSS, JavaScript, and React.js, ensuring responsive design and easy navigation. Demonstrates expertise in web development and graphic design.

Hospital Hub:

A comprehensive desktop-based hospital management system with features for patient data management, appointment tracking, and invoice printing. The application supports data backup and restore functionality to ensure information security. Developed using the MERN stack and converted to a desktop app using Electron.js and Tauri.

TinyTalk:

A real-time chat application that facilitates seamless and instant communication between users. Built with MERN Stack, Bootstrap, HTML, CSS, JS, Socket.IO for real-time updates, it supports both private and group chats, complete with message history and user authentication. Ensures secure, encrypted communication and delivers a smooth user experience.

Larkana Chamber:

A WordPress website developed for the Larkana Chamber of Commerce, providing vital business information and resources. Features an intuitive design, making it easy for users to access various services and updates. Built with WordPress, incorporating custom themes and plugins.

GNC Traders:

A WordPress website for GNC Traders, focused on highlighting their products and services. Designed with user experience in mind, featuring a clean, easy-to-navigate interface. Developed using WordPress, with custom themes and plugins to meet specific business needs.

Al Fadda Landscaping:

A WordPress website created for Al Fadda Landscaping, designed to showcase their landscaping services and project portfolios. Features high-quality visuals and detailed service descriptions, providing potential clients with comprehensive information. Built with WordPress, using custom themes and plugins for optimal performance.
